Vacancy

The Red Cross Red Crescent Climate Centre is the expertise centre of the International Red Cross and Red Crescent in the field of climate change and climate disasters. The Climate Centre's mission is to help the Red Cross and Red Crescent Movement and its partners reduce the impacts of climate change and extreme-weather events on vulnerable people.

The Climate Centre consists of an enthusiastic team that guides a growing network of consultants from all over the world in integrating climate risks into their work. The Climate Centre works closely with the Netherlands Red Cross, the International Federation of Red Cross and Red Crescent Societies (IFRC) and the International Committee of the Red Cross (ICRC)

Due to a vacancy at the Climate Centre, we are immediately looking for an intern to support projects in Europe on adaptation to climate change.

Envisaged start date: 15 December for a period of three months (40 hrs per week)

Project Title: Pathways 2 Resilience
Project Areas: Locally-led adaptation

Project Details: The intern will support the Climate Centre's Locally Led Adaptation workstream through two complementary initiatives: Pathways2Resilience (P2R), an EU-funded programme supporting regions in developing transformative climate resilience pathways, and the review of the IFRC Europe Climate Action Roadmap 2025, which guides climate action and adaptation efforts across National Red Cross and Red Crescent Societies in Europe and Central Asia.

Responsibilities/tasks:
The student will contribute to project implementation, knowledge management, research, stakeholder engagement, and learning activities across both initiatives such as:
Pathways2Resilience:
• Update of the project's visual mapping tools to capture regional climate adaptation priorities, resilience challenges, and emerging practices across participating regions
• Contribute to the development of project knowledge products and deliverables, including guidance materials, case study summaries, and practitioner-oriented resources
• Support capacity-strengthening activities, such as webinars, workshops, peer-learning exchanges, and training sessions with regional stakeholders
• More generally, the student will be able to support the Locally Led Adaptation team in the implementation of various other activities under the Pathways2Resilience project.

European Climate Action Roadmap
• Support the review and assessment of the IFRC Europe Climate Action Roadmap implementation across European and Central Asian National Societies.
• Conduct interviews and qualitative research with National Society representatives to document progress, good practices, challenges, and lessons learned related to climate adaptation and resilience programming
• Analyse findings to identify barriers, enabling factors, and emerging priorities for climate action in the evolving European climate, humanitarian, and policy landscape.
• Contribute to recommendations on how future regional climate strategies and communities of practice can strengthen locally led adaptation, climate resilience, and climate-smart humanitarian action

Skills and Abilities:

- Excellent verbal and written communication skills
- Excellent literature review, research, analytical and writing skills
- Ability to coordinate with different stakeholders
- Ability to work well in an inter-cultural team
- Ability to work well independently with a primarily remote-based team

Location:
This position will be home-based.

We offer:
The intern will receive compensation of Euros 450 per month based on a 40-hour work week.

How to apply:
We would like to receive your application, CV and cover letter (in English) sent to application@climatecentre.org. Please use **"Intern, Pathways2Resilience"** in the subject line.

Application deadline:
Tuesday, 1 December at 11:59 CET.

Please note that due to the expected number of applications, we will only contact you if you have been successful in your application.
